EDITORIALS

2018

Antegrade Fenestration and Re-entry: the Legacy Continues
Tajti P, Brilakis ES
Catheterization and Cardiovascular Interventions, September 2018

A New Treatment Strategy for Saphenous Vein Graft Lesions?: Letting it Go
Brilakis ES, Banerjee S, Burke MN
Journal of American College of Cardiology, May 2018

Medical simulation in interventional cardiology: “More research is needed”
Tajti P, Brilakis ES
Catheterization and Cardiovascular Interventions, May 2018

Complete revascularization for everyone: anatomic, functional, or neither? It depends!
Brilakis ES
Coronary Artery Disease, May 2018

Diabetic Patients Also Deserve TAVR!
Bagai J, Brilakis ES
Hellenic Journal of Cardiology, March 2018

Does the hybrid algorithm has real impact on long-term outcomes or should only be used as a valuable approach for CTO crossing?
Tajti P, Brilakis ES
Journal of Thoracic Disease, March 2018

The five key “ingredients” for improving outcomes in cardiogenic shock complicating acute myocardial infarction
Brilakis ES, Eckman P
Catheterization and Cardiovascular Interventions, February 2018

Editorial: Retrograde via epicardial collaterals: With power comes responsibility
Tajti P, Brilakis ES
Journal of Interventional Cardiology, February 2018

Wanted: expert operators for chronic total occlusion interventions
Brilakis ES, Krestyaninov O
Catheterization and Cardiovascular Interventions, February 2018
2017

**DK-crush should become preferred strategy for treating unprotected LM bifurcation lesions: no pain, no gain**
Brilakis ES, Burke MN, Banerjee S
Journal of American College of Cardiology, November 2017

**Clinical endpoints and key data elements in percutaneous coronary intervention of coronary chronic total occlusion studies: a call to the Academic Research Consortium for standardized definitions**
Ybarra LF, Piazza N, Brilakis E, Grantham JA, Stone GW, Rinfret S
JACC Cardiovascular Interventions, November 2017

**Does the end justify the means? The contemporary role of dissection/re-entry strategies for recanalization of coronary chronic total occlusions**
Karatasakis A, Brilakis ES
Catheterization and Cardiovascular Interventions, November 2017

**Full metal jacket: is it en vogue?**
Banerjee S, Brilakis ES
JACC Cardiovascular Interventions, July 2017

**Preventing and treating coronary perforations: Lessons from disaster management**
Sandoval Y, Brilakis ES
Catheterization and Cardiovascular Interventions, May 2017

**The role of rotational atherectomy in contemporary chronic total occlusion percutaneous coronary intervention**
Sandoval Y, Brilakis ES
Catheterization and Cardiovascular Interventions, April 2017

**Bypass Graft Failure: Changing What We Can, Accepting What We Cannot Change, and Developing the Science to Know the Difference**
Karaksonyi J, Brilakis ES
Circulation: Cardiovascular Interventions, April 2017

**Ipsilateral vs. contralateral vs. no collateral (antegrade only) chronic total occlusion percutaneous coronary interventions: What is the right choice for your practice?**
Azzalini L, Brilakis ES
Catheterization and Cardiovascular Interventions, March 2017
